9. Business Items

a. Climate Action Plan Update – Greenhouse Gas Emissions Forecast and Feedback on Potential Reduction Strategies and Actions

Background: In 2013, the City of Milpitas (City) adopted its first Climate Action Plan (CAP), which served as a roadmap to meet the State's 2020 greenhouse gas (GHG) emissions reduction target (i.e., 15 percent below 2005 baseline emissions). The CAP included GHG forecasts for the year 2020. The City has updated its inventory and forecasts, and is working to develop targets and strategies in preparation of its Climate Action Plan Update (CAP Update). The CAP Update is intended to reduce GHG emissions from community activities and municipal operations. The next step in this update process is to review the forecast of GHG emissions for target years 2030, 2040, and 2045. The CAP Update Project Team will provide an overview of these forecasts as well as associated methods, assumptions, emissions factors, and data sources. The GHG emissions forecasts will provide a foundation for the forthcoming steps of the CAP Update process, including the development of GHG emissions reduction targets and measures.

The CAP Update Project Team will also lead a discussion about potential GHG reduction strategies and actions.

Recommendation: Discuss and provide feedback as appropriate.
